

PRESS INFORMATION

Maxon Introduces the new DM230 Mobitex Modem

Maxon Europe are proud to announce the launch of the DM230 Mobitex Modem at the 2004 Mobitex Conference in Gothenberg, Sweden.

The DM230, a rugged 10 Watt modem, is designed to meet the requirements of Mission Critical Data communications and has evolved from the universally successful DM200 with a wideband (405Mhz to 465MHz) platform and integrated RS232 capability. GPS and Bluetooth functions are also soon to be available as options.

Mobitex is a Packet switched data transmission system, which gives high reliability and security of data transmission for a wide range of markets, from M2M to Fleet management. There are over 20 Public and Private Mobitex systems worldwide.

About Maxon

Maxon Europe Ltd. is a designer, developer, manufacturer and marketer of two-way radios, data modems and GSM handsets.
