

PRESS RELEASE

RAM Mobile Data nominated for the Dutch Deloitte Technology Fast-50 award

Maarsse, The Netherlands, 17 September 2004 – RAM Mobile Data (The Netherlands) BV has been selected as one of the fastest growing technology companies in the Netherlands in 2004. The Dutch Deloitte Technology Fast-50 program has been established to recognize fast growing technology companies. There are Fast-50 programs in 13 countries or international regions, plus 19 separate programs in the United States.

The Deloitte Technology Fast-50 award honors the 50 most fast growing companies in the Netherlands. The selection of the winners is based on the percentage of growth of turnover during the last five years (1999-2003). Technology Fast-50 winners are leading in areas of innovation, teamwork, and vision and are examples for other companies. The winning companies of Deloitte Technology Fast-50 2004 will be presented to the media and will receive their awards during the annual prize-giving ceremony in Amsterdam on September 23rd 2004.

=====

About RAM Mobile Data

RAM Mobile Data is an independent specialized provider of wireless and mobile data products and services. Beside that RAM is operator of the Mobitex network in the Benelux, the first packet-switched network for mobile data. From an independent position RAM Mobile Data offers network services on the basis of Mobitex, GPRS and UMTS. RAM Mobile Data also offers professional and customer services like consultancy, project management and technical support. RAM Mobile Data's Navigator Centre delivers hosting and managed services on the basis of several middleware platforms and gateways. The company has more than 1,200 corporate customers with more than 31,000 users in the Benelux.
