

M2M Technologies B.V. is a spin-off of HiTECHnologies Industrial Automation B.V. in IJsselstein, The Netherlands. M2M Technology will concentrate on mobile M2M products and networks. M2M Technology introduced an exclusive product line for Machine-to-Machine (M2M), remote control and telemetry applications during the SPS/IPC/DRIVES show on 29 – 30 November 2006 in Nuremberg.

The M2M products were introduced as a special M2M brand called:

M2M Control

The “M2M Control” modules are progressive scalable free programmable controllers with many communication features for different mobile networks. The use of GSM/GPRS is the most common used in Europe. The “M2M Control” modules can control, monitor, communicate and visualize, **ALL-IN-ONE**. For business critical applications we offer Mobitex network devices. The “M2M Control” modules are also available for Satellite communication and CDMA networks of Verizon and Sprint in the US. The M2M Control modules can control, log data, send alarm alert messages and visualization, **ALL-IN-ONE**.
