

For Immediate release

Nelson to Chair Mobitex Association

Gothenburg, Sweden, November 21, 2005. The Mobitex Association has named Charles Nelson, President and CEO of U.S.-based Velocita Wireless, L.P., as its next Chairman, effective January 1, 2006. The current chairman, Kevin Swann, Sales and Marketing Director of CML, will retire at this time, following the expiration of his two year term of office.

Commenting on his appointment, Mr. Nelson said, "I am honored to serve as Chairman of the Mobitex Association. As the first public wireless data only network within the United States, we are proud that we have contributed significantly to the growth of Mobitex. With over 30 networks globally, Mobitex is now in an outstanding position to evolve into the wireless data standard of choice, especially for business and mission critical applications."

Kevin Swann added, "I congratulate Charles on his appointment, and look forward to working with him to further develop the strengths of Mobitex. I will be taking a continued close and personal interest in Mobitex, and CML will continue to deliver exceptional semiconductor devices like the CMX990 M2M 'SuperChip' that the industry needs to ensure its continued success."

Charles Nelson has more than 20 years of experience selling services and solutions based on computer and communications technology to government and enterprise customers. Before becoming President and CEO of Velocita Wireless, he held several senior positions with Cingular Wireless, including Vice

President of National Data Sales where he was responsible for all distribution channels for Cingular Wireless's Data products.

About Mobitex

Mobitex is a leading international technology for dedicated wireless data. Mobitex is an all-digital, packet-switched radio technology providing for a single integrated network that is cellular in design with distributed intelligence. It provides an always-on, highly secure environment, the highest levels of reliability, fast data delivery in seconds, the longest battery life in the wireless industry, true push functionality and extensive, seamless coverage.

There are thousands of Mobitex-enabled applications worldwide. Wireless data applications include interactive messaging, e-mail access, field sales and service, transportation, public safety & government, point-of-sale, telemetry and wagering.

About the Mobitex Association (MA)

MA is the worldwide trade and business development organization for Mobitex wireless data network operators, hardware and software manufacturers and customers. MA is dedicated to expanding the global reach of Mobitex, developing and maintaining international standards for Mobitex, and promoting the continued development of applications, service, solutions and devices for Mobitex networks around the world. For more information on MA, please visit our Web site at: www.mobitex.org.

About Velocita Wireless, L. P.

Headquartered in Woodbridge, New Jersey, Velocita Wireless is dedicated to providing premier wireless data products and services for enterprises and governmental organizations deploying wireless email, messaging, machine-to-machine, automated vehicle location, point-of-sale and field force automation applications. For over a decade, we have provided direct and wholesale wireless data connectivity through our national data network to over 400 Fortune 1000 companies, 50 government organizations and hundreds of thousands of

messaging users, nationwide.

Today, Velocita's network covers 93% of the U.S. business population in 492 metropolitan areas and 130 major airports and is the standard by which other wireless data networks are measured. Throughout hurricanes and disasters, including Hurricane Katrina, the Northeast Blackout and the events of September 11, the network provider that keeps on working and keeps companies connected and communicating is Velocita Wireless.
