The Mobitex Association welcomes two new board members

Sweden November 20, 2007 - During the annual Mobitex Association Conference, the worldwide meeting for the Mobitex community, which was held in New Jersey, USA on October 15-16, two new board members were appointed for the Association's Board of Directors: Mark Hull (CEO of Velocita Wireless) and Dirk Fabels (Managing Director of RAM Mobile Data). The two new board members bring years of experience from the wireless data business to the Board, which will prove most valuable for the continued success of the Association.

Mark Hull currently represents the largest Mobitex network. He served as Vice President and General Manager at Velocita Wireless whilst the company was a Sprint Nextel subsidiary, and prior to that he spent 13 years at Sprint Nextel itself. Mark has 22 years of experience from the wireless telecommunications sector, managing sales and network operations as well as designing and implementing industrial radio communications systems.

Dirk Fabels is Managing Director at RAM Mobile Data Netherlands. He served as Manager of Professional Services before becoming shared owner of the company in 2002, along with Joachim Kaarsgaren. Prior to joining RAM in 1998, he worked for Canon Europe for six years where he had several functions. Dirk has a Technical College degree and a Masters degree in Business Administration.

Apart from these two new members, the board also consists of Per-Erik Sundström, who is Chairman of the Board. Mr. Sundström has worked with Mobitex Technology AB as Account Director from its establishment in 2004. Prior to this he served on several managerial posts within Ericsson, mainly focused on the Mobitex product. "We are very pleased to be able to reinforce the board with representatives from two of the most experienced and successful operators in the Mobitex sphere", says Mr. Sundström, who was elected chairman in June 2007. He continues: "The Mobitex Association is a community with great potential, and in the next year we will focus on giving as much support as possible to our members to ensure that they see a substantial value in their membership."

About the Mobitex Association (MA)

MA is the worldwide trade and business development organization for Mobitex wireless data network operators, hardware and software manufacturers and customers. MA is dedicated to expanding the global reach of Mobitex, developing and maintaining international standards for Mobitex, and promoting the continued development of applications, service, solutions and devices for Mobitex networks around the world.
