### **Velocita Wireless Expands Network Coverage in Auburn, New York**

*More than 470 base stations added nationwide since 2003 to improve and extend the reach of Velocita's wireless data network*

**WOODBIDGE, NJ, May 31, 2005** --- To meet increased user demands for its wireless data communications services, Velocita Wireless, L.P., a leading provider of wireless data connectivity for mission-critical applications, has recently enhanced its nationwide network with the deployment of wireless base stations in Auburn, New York. The base station deployment will augment Velocita's existing network footprint to provide customers in the Auburn and surrounding areas with an even higher level of service.

"Deployment of these base stations is reflective of our on-going network expansion strategy of delivering greater coverage, capacity and enhanced service as our clients' business requirements change," said Craig Gosselin, Chief Marketing and Sales Officer of Velocita Wireless. "Our commitment to providing our customers with a superior wireless data experience, regardless of region, remains steadfast."

From wireless email and messaging, alarm monitoring to vending applications, lighting & utility control, vehicle tracking, remote engine diagnostics, and point of sale, Velocita Wireless remains the original and still obvious choice for dedicated, data-only connectivity for mission-critical wireless applications. The Velocita network utilizes Mobitex technology which is currently operating in more than 32 public/private networks in 23 countries with millions of users and Mobitex-enabled devices. Specifically designed and built for data communications – not voice – the Velocita Wireless network continues to enjoy broad marketplace acceptance due to its seamless, nationwide coverage, low latency and high reliability.

**About Velocita Wireless, L. P.**

Headquartered in Woodbridge, New Jersey, Velocita Wireless is dedicated to providing premier, complementary, wireless data products and services for enterprises and governmental organizations deploying mission-critical wireless email, messaging, machine-to-machine, automated vehicle location, point-of-sale and field force automation applications. For over a decade, Velocita has provided direct and wholesale wireless data connectivity through its national packet data network to over 400 Fortune 1000 companies, 50 government organizations and nearly 25% of all BlackBerry users, nationwide.

Today, Velocita's network covers 93% of the U.S. business population in 492 metropolitan areas and 130 airports and is the standard by which all other wireless data networks are measured. Through hurricanes and disasters, the Northeast blackout and the events of September 11, the network provider that keeps on working and keeps companies connected and communicating is Velocita Wireless.
